

I believe the FCC should not implement any proposal that would lessen Indiana's Telephone Privacy law protections. Indiana's Telephone Privacy law has improved our family time at home. We used to be constantly bugged by snotty telemarketers trying to sell us something we aren't interested in. We would receive at least 12 calls per week and now I don't receive any and it is so nice to be able to relax at home now. Please do not change our Telephone Privacy program!!!!
